## Spang User guide

The Spang app allows an android device to remotely control a windows computer. For this to work the computer needs to have a server running on it. The server is a standard console application.

### What you can do

Use the android-side API to

- Move the mouse.
- Left click
- Right click
- Scroll
- Type text
- Setup and use shortcuts
- Change the volume using android volume buttons
- Opening google using the search button on android.
- Connecting to a computer.
- Get connection information form a QR-code
- Generating a QR code (server side)

### What you cannot do

- Control applications that directly interfaces with the mouse and keyboard drivers.
- Send sound.
- Use application to login. (login screen windows)
